

K-LOVE serves me and my family every single day. We are able to participate in worship services using K-LOVE alone. I just moved from Sacramento, CA where K-LOVE is virtually the only safe radio station for the whole family, and also commercial free! Local radio stations shamelessly brag about making severely objectionable broadcasts, such as KWOD advertising "The radio station that gives you free porn!" Even local Christian radio stations such as KKFS the fish that claim to be safe for the whole family have offended my family several times. K-LOVE has become the only radio station on the air in my area that offers safe broadcasting with modern contemporary Christian rock. Basically, it's the only station in my area that you can hear a guitar on without hearing immoral garbage. That's why millions of listeners pay millions of dollars each year to support K-LOVE. In addition to playing great music K-LOVE is very educational. They run dozens of spots where organizations give tips on how to discipline children meaningfully, how to enhance your marriage, and finding more time with your family. K-LOVE's on the hour news updates alert me to current events which I would not otherwise be aware of since my family doesn't watch the news. The news on television is full of commercials, and always dilutes important news with stupid updates about celebrities, etc, where as K-LOVE doesn't throw in the garbage or commercials. K-LOVE is also a great source of news about issues in the Christian community that secular news providers are "too cool" to mention. K-LOVE also has a toll-free line for people in distress. I worked at an inbound call center for over a year where we accepted pledge calls for dozens of PBS TV stations. Many, many times we received calls from people in distress saying they wanted to commit suicide. Our operators had to hurry and get these desperate callers off the phone, many times by cruelly hanging up on them. But after I found K-LOVE, I was able to transfer these desperate callers to K-LOVE's distress line. I've had callers call me back days later to thank me for transferring them to K-LOVE, and let me know that they are doing better. K-LOVE provides so many other services to the community, it would take weeks of full-time shifts for your employees to read about them all. Don't take away our K-LOVE station!
